Product designation

Fullriver, HGL Series, valve regulated sealed lead acid batteries

(Refer to the Schedule/enclosures for further specified details)

Agent/distributor

R & J Batteries

852 Latrobe Street, BALLARAT, VIC, AUSTRALIA, 3350

Registrant

Guangdong Fullriver Industry Co. Ltd

Taishi Industrial Area, Yu Wo Tou Town, Panyu Zone, GUANGZHOU, GUANG DONG PROVINCE, CHINA, 511475

Producer

Guangdong Fullriver Industry Co. Ltd Taishi Industrial Area, Yu Wo Tou Town, Panyu Zone, GUANGZHOU, GUANG DONG PROVINCE, CHINA, 511475

Conformance criteria and evaluation

The Fullriver, HGL Series, valve regulated sealed lead acid batteries has been evaluated and verified as conforming with the relevant requirements of the following criteria.

1. Technical Specification TS001, Version 1.1, 17-Jul-2006, 'Lead-acid batteries for control and indicating equipment, AS 4428.5-1998, clause 2.6'.

Limitations/conditions of conformance

Limitations/conditions of conformance, where identified on this certificate, are derived from qualifications from evaluation(s) for conformity and/or other related technical documentation. All details with respect to design, assembly and installation instructions and restrictions should be checked against the producer's current technical manual/data sheets and the requirements of the Authority having Jurisdiction.

Specified limitations/conditions, determined from the evaluation for conformity, include the following.

i. TS-001 does not establish the evidence required to demonstrate conformity of VRSLA batteries to electrical safety regulations that apply to CIE and related applications due to the requirements now specified in AS/NZS 62368.1:2018. This certification is issued within the scope of CSIRO Verification Services – Rules governing ActivFire Scheme and is valid only for the product(s) as submitted for evaluation and verification of conformity, subject to the following conditions.

- Reference to details, limitations and requirements, where documented as a schedule/enclosure with this certificate.
- The Registrant is responsible for their attestation of conformity and ensuring that on-going production complies with the conformance criteria defined in this certificate.
- This certificate will not be valid if any changes or modifications are made to the product which have not been notified and validated by CSIRO Verification Services.
- This certificate is subject to periodical re-validation upon verification that all requirements, as determined by the conformity assessment body, continue to be satisfactorily met by the Registrant.
- This certificate may only be reproduced in its published form, without modification and inclusive of all schedules/enclosures.
- Any changes, errors or omissions, must be submitted in writing and if necessary or requested, substantiated with relevant evidence.
- Any representations, such as advertising or other marketing related activities or articles shall reflect the correct contents of this certificate and conform with all relevant trade practices and consumer protection legislation and regulations.
- Any terms or conditions of use as applicable to content and documentation as published or accessed through web sites administered by the CSIRO Verification Services.

Schedule to

Certificate of Conformity

Certificate num.	Registration date	Version		Valid until	
afp - 2430	15-Jun-2010	Number 14	Issue date 15-Apr-2024	30-Jun-2024	Page 2 of 3

Producer's description

The Fullriver, HGL Series, valve regulated sealed lead acid batteries utilize an electrolyte suspension system consisting of high porosity, glass fibre material which in conjunction with plates, totally absorb and contain the electrolyte. No silica gels or any other contaminants are used. Fullriver batteries incorporate a built in design that controls gas generation.

The batteries are equipped with safety release valves, designed to operate between 2 and 5 psi and automatically reseal.

For cyclic use, a service life of 1000 discharge/recharge cycles can be realized, dependent on the average depth of discharge. For float applications, this equipment have an expected life span of 3 to 5 years.

Technical specification

The following details are a representative extract of the technical specification for the Fullriver, HGL Series, valve regulated sealed lead acid batteries and may be subject to change. Complete and current details should be determined from the designated producer's technical manual/data sheets.

Design life: 3 to 5 years

Operating temperature: -15°C to 50°C (recommended)

Grid alloy: Calcium/Tin lead allow

Plates: Flat pasted

Separator: AGM (Absorbed Glass Mat)

Active material: Lead Case and cover material: ABS

Charge voltage: Float 2.27-2.30 VPC@25°C, Cycling 2.40-2.49 VPC@25°C

Electrolyte: Sulphuric acid

Terminal: faston tab type, bolt fastening type, threaded post style, or lead wire type,

depending upon the type of battery.

Battery type	Nominal voltage (Vdc)	Nominal capacity 20 Hr (Ah)	Length (mm)	Height (mm)	Width (mm)	Total height (mm)	Approx weight (kg)
