Technical Information

Predator Raptor is one of the most advanced lithium Motorcycle & Powersport starting batteries on the planet! The Raptor series feature an integrated BMS which actively protects the battery if the voltage, current or temperature move outside the normal operating limits. In intelligent mode, the battery will hibernate when the selected criteria are met (set using Bluetooth App) or if the battery reaches its discharge limit, reserving enough power to start your engine when required.

The Predator Raptor series feature newly developed *Shake to Wake* technology, which enables the user to remotely wake up a hibernating battery using movement. The HyperFlex Fitment System uses quad terminals and EVA spacers to enable each battery to replace a range of sizes.

Features & Benefits

- Higher Cranking Power
